LATEST AI INSIGHT

Your best trading performance appears when you follow predefined exit rules and avoid additional trades after losses. The next improvement area is emotional exit management.

My Trading Rules

- 01 Never trade without a valid setup.
- 02 Always define Stop Loss before entering.
- 03 Stop trading after two consecutive losses.
- 04 Never move Stop Loss because of emotions.
- 05 Review emotional state before entering every trade.

Current Development Focus

- ☐ Exit Discipline high
- ☐ Revenge Trading high

ESTIMATED DEMO TIME: 5 MINUTES

This demo showcases the core workflow and key features of Trader's Journal.

Typical User Workflow

A simple 4-step flow to document, analyse and improve every session.

- 1 Complete Session Prep**
Record your mindset, expectations and goals before starting your trading session.
- 2 Add Your Trading Session**
Paste your session summary, attach screenshots and include any additional observations.
- 3 Generate AI Review**
AI analyses all provided information and automatically organises the review into dedicated journal sections.
- 4 Review Your Progress**
Monitor your performance, identify recurring patterns and continuously improve your decision-making process.

AI Trading Review

This was a disciplined loss — the setup and process were sound, even though the market didn't cooperate.

- Trading discipline: Very Good
- Emotional control: Good
- Best-performing setup so far: London Breakout
- Rule compliance across recent trades: 88%

RECOMMENDED DEVELOPMENT PRIORITIES

- Maintain current process — this is a strong template to repeat
- Exit discipline
- Confidence after losses

OVERALL PROGRESS

You are gradually becoming more process-oriented and less outcome-focused, which is reflected in your improving consistency.
